UPDATE ON **Tuesday, 27 September****

TO BE PLACED ON COUNCIL'S WEBSITE ON **Tuesday, 27 September**

DESIGNATED BUSHFIRE PRONE AREAS

Frankston City Council recently amended designated Bushfire Prone Areas within its municipal boundaries.

This information is important for owners, building designers and building surveyors, particularly at the design and building permit stages of proposed developments.

This amendment may require additional protective measures to be incorporated into new buildings and alterations to existing buildings. This amendment does not affect existing buildings and structures.

Frankston City Council is in the process of notifying all affected residents.

If you would like more information about designated Bushfire Prone Areas, contact the Municipal Building Surveyor Matt Hansen on 9784 1900.
