

Here's what our community told us is important to them...

“Solar power, grey water usage, plant more trees”

“Please invest in more public amenities amongst local Carrum Downs parks with BBQ's, playgrounds, bike tracks, bins, outdoor gyms”

“Shade areas in playgrounds and safe paths in reserves”

“Use 100% water recycling”

“Continuous bike/pedestrian paths”

“more green-links leading into Frankston Station from surrounding areas (like Evelyn Street)”

“Addressing the impacts of climate change, rising sea levels, heat island effects”

“More bike paths - would like to ride my bike to work but am too scared to ride my bike on the road.”

“Water recycling, stormwater, wastewater”

“A water play park for children”

“Plenty of plants and trees, places to sit and shaded areas”

“Lighting (solar and powered)...Bicycle and walking tracks”

What we did with this information

We analysed this feedback alongside local data and trends to identify a range of initiatives that address these needs and suggestions. We then combined these initiatives into the following priority projects that require Council-led advocacy to state and federal governments.

Draft Advocacy Priorities

Enhancing our environment and liveability

The theme of *Enhancing our environment and liveability* focuses a range of policies, strategies and initiatives that respond to our community’s desire to preserve and enhance our natural assets such as our parks and water.

Advancing our recycled water capacity

Expanding our recycled water infrastructure network to deliver more sustainable water sources for the irrigation of local parklands, reserves and sports grounds.

A district playground in Carrum Downs

Establishing a new district playground at Sandfield Reserve in Carrum Downs, creating exciting opportunities to play and enjoy our outdoors for all ages and abilities.

Improving our climate resilience

Growing our urban forests and improving Council’s ability to proactively implement and analyse the effectiveness of climate mitigation and adaptation initiatives.

Enhanced outdoor leisure experiences

Creating vibrant, safe and accessible suburban precincts by improving paths and connectivity between parks, reserves and precincts and creating informal recreation opportunities for all ages and abilities.

Sustainably powering and lighting our neighbourhoods

Supporting sustainable energy sources by installing solar systems on key council-owned facilities and upgrading street lighting across Frankston City to energy efficient LED.

Foreshore activation and revitalisation

Enhancing the vibrancy and recreational opportunities at our waterfront locations and improving the connectivity from foreshore to city centre.
