

The park provides a connection to Kananook Creek and an opportunity to provide a focal point for visitors. There is an opportunity to design a lookout to highlight the park's location on Seaford Beach secondary dunes above naturally formed Kananook Creek.

Design Outcomes:

- Identify overall vantage points for bird's eye views to the creek and the vegetation community in the reserve.
- Build a lookout deck to enable views over the creek and surrounding bushland in order to provide a visual connection to the creek (Subject to Cultural Heritage Management Plan Studies).
- Consider using a suspended deck arrangement in order to minimise disturbance to the native vegetation.
- Design in consultation with Heritage Advisors to avoid impact to any artefact sites in the area.

Enhance connection to Kananook Creek
