

Implement landscape improvements to create a unified landscape character, strengthen the identity of the park and create a memorable experience for park users.

Design Outcomes:

- Realign paths and improve connectivity throughout the park focussing on sightlines, accessibility and uniform surfaces.
- Focus on creating welcoming gateways at Seaford Road and Station Street with 'kerb appeal'.
- Install bespoke park furniture including seats, tables, bins, and drinking fountains.
- Design and install public lighting at key nodes and access points.
- Design and install way-finding signage.
